Sprint period: 2012-10-15 - 2012-10-22

Part 1: What will be done this Sprint?

This sprint we decided to round up our work, since it is the final handin.
We will fix all documentation that is needed, fix bugs and issues, and refine the gameplay and visual feeling. We will also implement those features that we deem important to the project but aren't completely finished.

Part 2: How will the work get done?

We immediately realized that it would be tight with time to get everything done in time, especially since we also had a math exam on the saturday. Even so, we will just have to do the best we can and make sure that it is finished in time. We estimated and divided the time between everything that has to be done.
